

# A Dell PowerEdge MX environment using OpenManage Enterprise and OpenManage Enterprise Modular can make life easier for administrators

Compared to a Cisco UCS®-X environment using Cisco Intersight®, the Dell environment streamlined making changes to VLANs and helped avoid interventions during scheduled firmware updates

## Save admin time

Make VLAN changes to the environment in 40% less time\*

Hands-on administrative time (mm:ss, lower is better)

## Reduce the likelihood of error

with 33% fewer steps to make VLAN changes to the environment\*

Hands-on administrative steps (lower is better)

## Avoid manual admin intervention during overnight maintenance windows

with the ability to schedule firmware updates
