Get faster boot times by upgrading to Windows® 10

Windows 10

Windows 7

Windows 10 **19.34**

Windows 7 **27.37**

28% faster average boot time
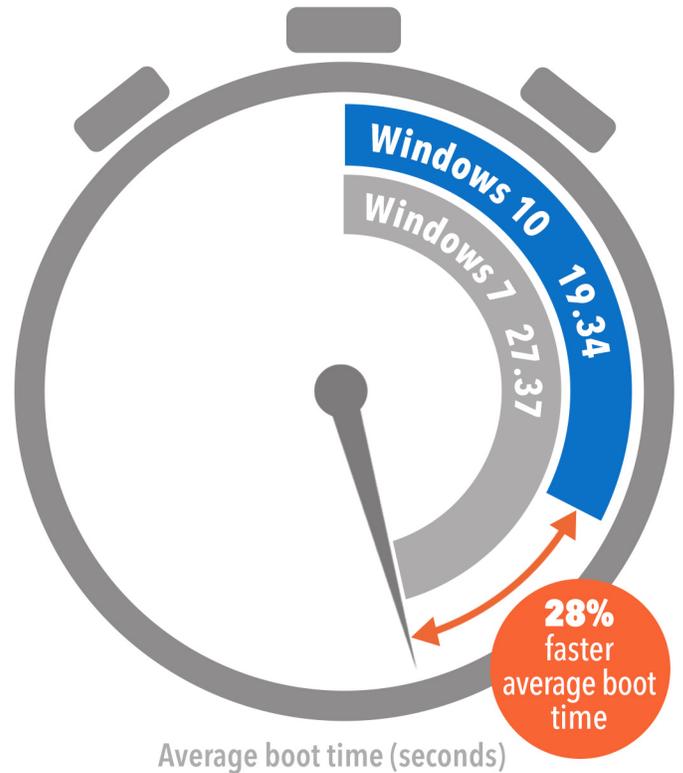

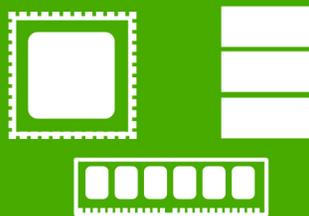

Average boot time (seconds)

In our hands-on tests, upgrading from Windows 7 to Windows 10 improved startup times by an average of 28%. That means upgrading could give you a better everyday experience on your computer.

We ran 20 top-selling Windows 7 laptops and desktops sold between 2010 and 2015 through hundreds of various real-world test cycles.

The systems, in various form factors, came from nine vendors with 2 to 8 GB of RAM, processors from Intel® and AMD, and storage ranging from 250 GB to 1 TB.

Windows 10

After testing the Windows 7 systems, we upgraded to Windows 10 and repeated our process. Results showed that after upgrading, startup was faster on all the machines.
